Summary

Final-year B.Tech CSE (AI & ML) student with hands-on experience building a retrieval-augmented generation (RAG) chatbot using Python, LLM APIs (OpenAI, Gemini), OCR and semantic search. Currently interning at MPOnline, translating stakeholder requirements into AI-powered applications. Solid foundation in Python, Pandas, NumPy and classical machine learning; keen to build data-driven GenAI solutions for real estate.

Skills

Generative AI & LLMs: RAG, Prompt Engineering, LLM APIs (OpenAI, Gemini), Semantic Search, NLP (OCR)
Machine Learning: Supervised & Unsupervised Learning, Classification, Regression, Clustering, Neural Networks, Scikit-learn
Programming: Python **Libraries/Tools**: Pandas, NumPy, Matplotlib, Seaborn
Web & APIs: React.js, REST APIs
Core CS: Data Structures & Algorithms, OOPs, DBMS, Operating Systems
Languages: Japanese (Intermediate, currently improving)

Experience

Software Engineering & Development Intern Bhopal
MPOnline Limited (Govt. of MP & TCS Joint Venture) *July 2026 – Jan 2027*

- Spearheaded end-to-end system analysis and requirements engineering for digital governance solutions, working with stakeholders to turn their pain points into actionable technical projects.
- Translated complex citizen-support workflows into robust technical architectures for AI-powered applications.
- Built a RAG-based FAQ chatbot over an unstructured service rulebook, combining document OCR, a searchable knowledge base and semantic search for fast, accurate answers to user queries.

Projects

AI-Powered FAQ Chatbot (RAG) | *Python, OpenAI/Gemini APIs, OCR, React.js*

- Designed and built a retrieval-augmented generation chatbot that answers questions from a domain-specific MPOnline service rulebook, using document OCR, a searchable knowledge base and semantic search.
- Integrated OpenAI/Gemini LLM APIs in Python and built the React chat UI; added an "Ask an Expert" escalation for queries the chatbot cannot resolve.
- Added grievance registration, feedback submission and an analytics dashboard to give business teams visibility into user queries and satisfaction.

Student Performance Prediction System | *Python, Pandas, Scikit-learn*

- Built classification models (Logistic Regression & Decision Tree) to predict student performance.
- Cleaned and preprocessed data and evaluated model performance using Pandas and Scikit-learn.

Education

VIT Bhopal University Bhopal, India
B.Tech in Computer Science and Engineering (Specialization in AI & ML) *Graduation Year: 2027*

Carmel Convent School, Amlai (CBSE) Madhya Pradesh
Class 12th *Percentage: 79.20%*

Certifications

Certification in Advanced Software Engineering & Development Internship July 2026 – Jan 2027
MPOnline Limited (CMMI Level 3 & ISO Certified) *ID: MPO/INT/.../26052551*

Positions of Responsibility

Vice President, Anterix Club: Led astronomy events and expanded club outreach.

Student Coordinator, Industry Conclave 2024, VIT Bhopal: Helped run the flagship university industry event featuring the Technical Officer of STPI and the CEOs of Netlink, Preprod Crop and Global Drone Hub.

Student Ambassador, NSSC'24, IIT Kharagpur: Promoted the National Students' Space Challenge through outreach.
